

09337 EUROTRAK TOUCH

This equipment can be used to perform lumbar and cervical tractions. Traction can be applied in a “static”, “dynamic” or “intermittent dynamic” mode. A series of pre-set programs aimed at specific pathologies is available, with the option of storing up to 50 personalized treatments. The display visualizes all the parameters set at a certain time and any parameter value may be modified extremely easily and quickly if required. It has a 6” colour display with graphic interface that allows to keep under control the various stages of the treatment in real time, both during traction sessions and the pauses. Throughout their treatment, patients have access to an emergency stop button to stop traction if they wish to do so.

EXCELLENT

Therapeutic indications:

- Disc protrusion;
- Disc hernia;
- Hypomobility;
- Degenerative discopathy.

CE 0476

The EUROTRAK TOUCH electronic traction unit is designed to be used with a specific therapy table made by Chinesport or another manufacturer. In any case the traction unit needs an additional, purpose-built support frame, and we can provide technical drawing for the supporting metal plate. We propose two optional therapy tables to be combined with our electronic traction unit: the model called ALFATRAC is at fixed height, the alternative BETATRAC is with a frame height adjustment.

Option 1 - Eurotrak touch fitted to Betatrak table, with height adjustment.

Option 2 - Eurotrak touch fitted to Alfatrak table, with fixed height.

TECHNICAL FEATURES

Power voltage / frequency:	100-240V, 50/60 Hz
Input power:	80 VA
Maximum output force:	90 kg (Lumbar), 20 kg (Cervical)
Minimum output force:	1 kg (Lumbar), 1 kg (Cervical)
Regulation delta:	0.1 kg
Rope length:	95 cm
LCD screen resolution:	640x480
Rope durability:	1000 hours at least
Protection class:	I-BF
Directives:	93/42 / EEC, IEC 60601
Dimensions	41 x 44 x 18 h cm
Weight	15 kg

Standard Accessories

	Q.TY
Power cable (UK + EU)	2
Emergency stop button	1
Pack of screw	1

Optional Accessories

XW001.W? BETATRAC E
XW002.W? BETATRAC H
09324 ALFATRAC

Traction tables

Made in Italy

11

Eurotrak Touch is not included in the table supply

09324 ALFATRAC

Fixed height table specifically designed for tractions, with two sections and fixed height. The construction is made from coated metal with high density padding and synthetic leather upholstery. Both lumbar and cervical tractions can be applied. The table is supplied with a specific support frame to be fitted to the EUROTRAK TOUCH traction unit - code 09337 or other electronic device. The support plate is height-adjustable. The table has a chromed mini-frame with anchoring hooks fitted to the head section, two more padded supports for the underarm area and a height-adjustable spreader bar for the traction rope. For lumbar tractions, there is a sliding section underneath that reduces rubbing between patient and table surface. This section can also be tilted laterally by hand up to a 10° angle, so the trunk can be rotated during traction. The supply includes a series of straps in various sizes for application to the cervical, pelvic and thoracic area, and some cushions so the patient can be comfortably positioned and a correct longitudinal traction of the spine is achieved.

Note: the postural cushions included in the standard supply come in the same color as the table upholstery, unless otherwise specified.

TECHNICAL FEATURES

Head/trunk section	Sliding on tracks
Head section lateral tilt	10°
Eurotrak traction unit support	Height-adjustable
Safe load	135 Kg
Dimensions	190 x 70 x 64 h cm
93/42/EEC Class	I

Standard Accessories

	Q.TY
Medium thoracic strap	1
Large thoracic strap	1
Medium pelvic strap	1
Large pelvic strap	1
Chin strap	1
Cervical cushion	1
Lumbar cushion	1
Trapezium tube	1
